I'm a small hobby breeder, located in southern Florida. It is my passion for this breed and the desire to continue to improve not only the health and working abilities of my dogs that motivates me to seek out TOP producing males for my two females; they are usually located in Germany. My goal is to produce dogs that are healthy and can live with you for a long time; dogs that have strong nerves and clear minds in order for you to use them for whatever it is you have in mind for them. References about dogs sold in the past are gladly given upon request. Please feel free to call me with any questions you might have in regards to any of my dogs!
